

Company Profile

Engineering, procurement & **construction** for the oil & gas industry

EPC Contractor · Civil, mechanical & electrical works

Founded 2014

An end-to-end execution contractor

VENEZCONSTRUCTORES, C.A. is a company specialized in services for the oil & gas industry, construction and civil engineering, founded on May 15, 2014 in eastern Venezuela. We deliver end-to-end — from the design stage through to commissioning.

We have delivered for operators and upgraders across the sector — PDVSA, PetroCedeño, PetroIndependencia and SINOVENSA — backed by the professionalism of our people, the quality of our processes, and our technical and operational capacity.

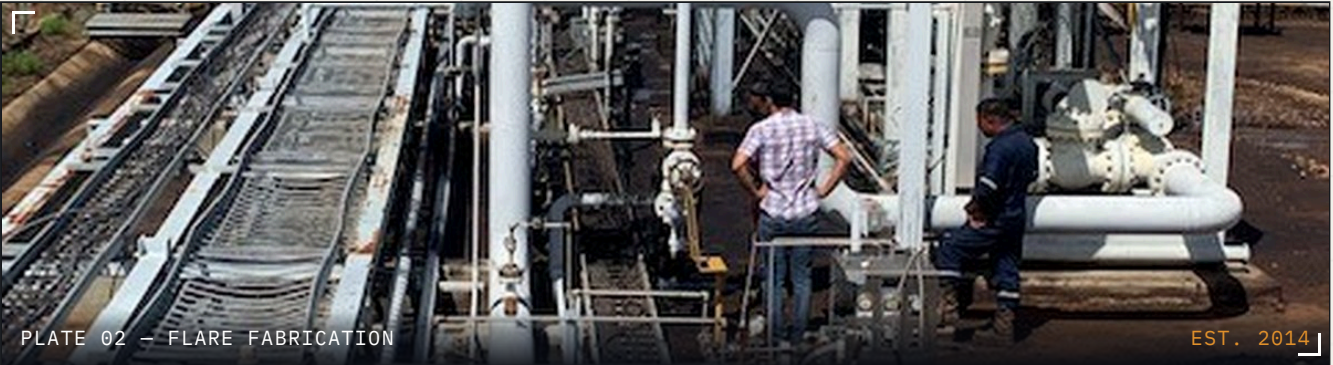

PLATE 02 — FLARE FABRICATION

EST. 2014

Vision

To be the preferred execution company for civil, electrical and mechanical works in every market where we choose to operate.

Mission

To exceed the requirements agreed with our clients, from design through to project operation, turning every project into firm proof of our commitment to excellence and quality.

Purpose

To deliver comprehensive technical solutions built on certified experience, qualified personnel and systematic management that guarantees quality, safety and operational reliability.

• RESPONSIBILITY

• INTEGRITY

• SAFETY

• COMMITMENT

10+

YEARS OF EXPERIENCE

15+

YEARS OF LEADERSHIP EXPERIENCE

34 m

FLARE INSTALLED

500 bbl

API 650 TANK CAPACITY

Comprehensive technical solutions

Detailed Engineering 01

Basic and detailed engineering, structural drawings, design calculations and technical specifications.

Procurement 02

Supply of materials, critical equipment and certified consumables under ASTM, API, COVENIN and ISO standards.

Construction & Erection 03

Heavy and light steel structures, reinforced concrete, and industrial and civil buildings.

Storage Tanks 04

Engineering, fabrication, erection and hydrostatic testing of atmospheric tanks for crude and derivatives (API 650).

Flare Systems 05

Engineering, construction, assembly and installation of flare systems for the controlled burning of gases.

Earthworks 06

Mass excavation, grading, dynamic and static compaction, and handling of class A, B and C materials.

Flowlines & Pipelines 07

Surface and buried piping for crude and diluent under API 5L and ASME B31.3 — cutting, routing, qualified welding and pressure testing.

Industrial Maintenance 08

Predictive, preventive and corrective maintenance programs for rotating and static equipment.

Electrical, Mechanical & Instrumentation 09

Installation of low- and medium-voltage electrical systems, control, automation and metering equipment.

Sanitary Works 10

Replacement and rehabilitation of sewage collectors, sewer networks, pumping stations and primary treatment.

Educational & Healthcare Infrastructure 11

Construction of schools and educational centers; chemotherapy rooms built to biosafety criteria and health regulations.

Where we make the difference

01

Feasibility Analysis

Techno-economic assessment, master schedule (PERT/CPM), risk analysis and quality-assurance planning (QA/QC).

02

Project Management

Multidisciplinary management under PMI (PMBOK) standards: control of scope, time, cost, quality and safety (HSE).

03

International Standards

Execution under API, ASTM, ANSI, ASME, COVENIN and IEC standards and the guidelines of sector operators.

04

API 650 Crude Tanks

Design, fabrication and erection of atmospheric tanks up to 500 barrels, with leak testing and welding certification under ASME IX.

05

Flare Systems

Flare structures up to 34 m with ignition system, discharge line, liquid separator (knock-out drum) and a thermally insulated stack.

06

Crude & Diluent Lines

Rehabilitation and reconversion of hydrocarbon pipelines, with hot-fluid handling, mechanical-integrity control and industrial-safety procedures.

PROJECTS DELIVERED FOR SECTOR OPERATORS AND PARTNERS

PDVSA

SINOVENSA

PETROINDEPENDENCIA

PETROCEDEÑO

HIDROCARIBE

CVG

Skilled people and operational capacity

R-01 Management team with over 15 years of combined experience in EPC projects nationwide.

R-02 Civil, mechanical, electrical and instrumentation engineers, architects and technicians.

R-03 Site foremen, certified welders, mechanics, electricians and heavy-equipment operators.

R-04 Proficiency in specialized software: AutoCAD, Revit, MS Project and Primavera P6.

R-05 Command of industrial-safety and quality-control standards.

Rotating & Static Equipment

MAINTENANCE, REPAIR AND COMMISSIONING OF:

- Screw pumps

- OH-type centrifugal pumps

- BB1+ centrifugal pumps

- Positive-displacement pumps

- Multistage vertical pumps

- Low- & medium-voltage motors

- Mechanical seals

- Internal combustion engines

Projects that back our track record

PROJECT 01

FLARE SYSTEMS
PetroIndependencia Plant
34 m flare — engineering, fabrication & installation
Orinoco Oil Belt

PROJECT 02

LINES & PIPING
PDVSA · San Diego de Cabrutica
Crude and diluent line replacement
San Diego de Cabrutica, Anzoátegui

PROJECT 03

STORAGE TANKS
Oil & gas sector
500-barrel crude tanks (API 650)
Eastern Venezuela

PROJECT 04

ROTATING EQUIPMENT
PetroCedeño Upgrader, S.A.
Pump and motor repair
Jose Industrial Complex, Anzoátegui

PROJECT 05

STEEL STRUCTURES
SINOVENSA Upgrader
Fabrication of industrial walkways
Morichal, Monagas

PROJECT 06

ELECTRICAL · MECHANICAL · INSTRUM.
PDVSA · San Diego de Cabrutica
Facility recovery at a well cluster
San Diego de Cabrutica, Anzoátegui

Quality, safety and reliability

V-01

Integrated Delivery

Solutions from the design stage through project operation and maintenance.

V-02

Industrial Safety (HSE)

HSE plans aligned with the international standards ISO 45001 and OHSAS.

V-03

Quality Control

Management system based on ISO 9001, with documentary traceability and non-destructive testing (NDT).

STANDARDS AND CODES WE APPLY

API 650

ASME B31.3

ASME IX

API 5L

ISO 9001

ISO 45001
